---

Island Equipment Company is looking for an experienced **Mechanical Engineer Manager**. This is a hands-on supervisory/management position requiring the candidate to supervise and coordinate a team of other engineers, technicians, operators and other workers engaged in producing and distributing industrial, medical, compressed and liquid gas. A qualified applicant must have knowledge and skill in determining work procedures, review and supervise work performed in an industrial and medical gas production operation. The applicant must also possess the necessary background and skill to perform trouble shooting and calibration of centrifugal compressors, motors pumps, instrumentation and control systems for Air Separation Plant, CO2 Plant and Dissolved Acetylene Plant.

**MAJOR DUTIES AND RESPONSIBILITIES:**

Description of duties is not intended to be all-inclusive or to limit the discretionary authority of supervisors and management to assign other tasks of similar nature or level of responsibility nor does it imply an employment agreement.

- Observe and implement strict quality control standards for the production of certain specialty gases
- Actively monitor all aspects of the production processes and ensure that all gas products are manufactured utilizing specific engineering specifications.
- Supervise design work prepared by other engineers for fabrication and installation of storage tanks holding industrial gases such as Oxygen
- Supervise a team of personnel that performs trouble shooting and calibration of centrifugal compressors, motors pumps, instrumentation and control systems for and air separation plant for the production of oxygen and nitrogen
- Manage preventative maintenance programs and operations of equipment at the gas production plant
- Assist the Plant Manager in reviewing all applicable government regulations for industrial gas production operations and implement or maintain any and all measures for compliance
- Conduct inspections of customer facilities and determine the suitability/design of an industrial gas storage tank
- Participate in management meetings, represent company at industry events, and perform other duties as assigned.

**ADDITIONAL QUALIFICATIONS**

- Must be knowledgeable of industrial management or processing methods and procedures
- Must be able to develop and sustain an atmosphere of cooperation between employees, customers, and community leaders while maintaining the objectives of the operation
- Ability to identify root causes of industrial and organizational problems and then utilize recognized problem solving skills to solve and implement effective solutions
- Must have the creative ability to recognize and solve complex operational problems and develop innovative solutions to the operation's needs
- Strong organizational and human relations skills to effectively interact with internal and external parties
- Must be an effective communicator – both verbal and written
